

Astropack

The pre-launch is coming!

August 30, 2017 (Paris, France). Nom Nom Games Lda. has the pleasure to announce the pre-launch for its latest craziness, Astropack, starting on September 25th in Hungary, Netherlands, Portugal, Finland, Malaysia, Israel and Mexico. This universe most fabulous astronaut is coming to your phone for this exceptional pre-launch in your country. Don't miss out on the occasion to show the world how fabulously good you are before everyone else. Just try to not die along the way though.

I mean, imagine an astronaut leaving his space station for some outside mission, when suddenly, his jetpack goes out of whack and propels him into an intergalactic vacuum... Now you are this poor guy, and it's up to you to survive by dodging threats and other obstacles that cross your path and try to destroy you! Rockets, planets, meteorites... Everything can crush you!

Don't make the mistake of underestimating the game though. As casual and simple as it is, it will soon prove to be a real challenge to your dexterity and your reflexes! A slight touch on the screen is enough to make you zigzag and jump all around space, and if you let go of everything, you'll fall... which might come in handy to avoid death.

Survive, be quick, be sharp, find the rhythm and cumulate combos to see your score multiply! With our online mode, climb the rankings, break records, summon your friends and be the King amongst them all!

Oh yeah, I almost forgot. We know how important your look is to you and to the universe so we have prepared various unlockable garments suitable for your missions. Since you've always dreamed of being a beautiful Unicorn, Cat, Zombie, Frog, Bird and whatever other sick fancy of yours that we will discover, you'll be able to look exactly how you always dreamed to be!

About Us:

Nom Nom Games Lda is a young independent studio developing, creating and distributing video games on any platform (console, pc, smartphone / tablet and web). Although we do not have many titles attached to our name yet, we hope to quickly delight players from around the world with unique videogame experiences.
